Q1. Question-1: Suppose in 'ipl18', you want to filter out the teams that have an NRR greater than zero, and for which the 'For' score exceeds the 'Against' score, i.e. both the conditions should be satisfied. Which teams will be left after you perform the above filtration?

```

```

Ans: B- SRH, CSK, MI

Q2. If all the stats are taken for both 'ipl17' and 'ipl18', which team with its total points greater than 25 will have the highest win percentage

```
In [4]: merge_df = ipl18.append(ipl17).reset_index()
    filter = ['Matches', 'Won', 'Lost', 'Points']
    groups = merge_df.groupby('Team').sum()[filter]
    groups["win_per"] = groups["Won"]/groups["Matches"]
    groups = groups.loc[(groups['Points'] > 25)]
    print(groups[groups.win_per == groups.win_per.max()])
```

Matches Won Lost Points win\_per
Team
SRH 28 17 10 35 0.607143

Ans: SRH
